Batch: BICE-2017

Course Code: ICE 4202

Course Title: ICT Project Management Lab

Semester: 8th

Date: 01/11/2020

Hospital Management System

The following features are the high-level requirements that this system satisfies:

- **Work Scheduling** - Assigning nurses to doctors and doctors to patients
- **Admissions**-Admitting patients, assigning the patients to appropriate wards
- **Patient Care** - Monitoring patients while they are in the hospital
- **Surgery Management** - Planning and organizing the work that surgeons and nurses perform in the operating rooms
- **Ward Management** - Planning and coordinating the management of wards and rooms
- **Waiting list** - Monitoring to see if there are any patients waiting for available beds, assigning them to doctors and beds once these become available
- **Emergency service**-Emergency Patients need immediate response so here the emergency calls will be received and managed.
- **Check Out**- If a patient checks out, the administrative staff shall delete his ID from the system and the just evacuated bed is included in available bed list.
- **Billing**- It includes the payment details of the patient. Depending on the payments bill report is generated.
